SUMMARY

I am a Final year bachelor's student specializing in Data Science & Artificial Intelligence at ICFAI University (Tech School). Passionate about applying machine learning and analytics with a **creative side** to real-world challenges, with hands-on experience in Python, NLP, and data modeling. Seeking internship/opportunity to grow AI skills and contribute to solving industry problems.

EDUCATION

ICFAI University, IFHE, Hyderabad B.Tech - AI & Data Science	Aug 2022 - Present
Current CGPA - 6.23	
Intermediate (MPC) - CGPA - 9.3	Apr 2020 - Mar 2022
10 th Graduate (State Boards) CGPA - 9.8	March 2020

WORK EXPERIENCE

Business Development Intern , Joraum solutions, Hyderabad.	Jun 2023 - jul 2023
- Performed cold calling as part of the business development team. - Demonstrated excellent performance, teamwork, and quick learning abilities, as acknowledged by the Director. - Built communication and client engagement skills during my internship.	
Data Scientist Intern , VirtuSync IT Pvt Ltd, Hyderabad	Jul 2024 – Dec 2024
- Participated in key projects including risk mitigation, demand forecasting, and real-time dashboard development. - Applied data modeling, analytics, and visualization techniques to solve complex business challenges. - Demonstrated strong problem-solving skills, technical proficiency, and effective teamwork.	

PROJECTS

Table2Charts: Recommending Charts by Learning Shared Table Representations

- Developed and deployed a chart recommendation system using Deep Q-Learning and Copying Mechanism, leveraging shared table representations to interactive visualizations for tabular data.
- Trained the framework on a large dataset of (table, chart) pairs, achieving a top-3 recall rate of over 60% in recommending accurate chart types across multiple categories, outperforming existing baseline algorithms.

Credit Card Fraud Detection

- Designed and implemented a machine learning model to detect fraudulent credit card transactions by analyzing transactional patterns by leveraging Python, pandas, and scikit-learn for model development.
- Experimented with multiple classification algorithms (e.g., Logistic Regression, SVM, KNN) and evaluated performance with precision, recall, and ROC-AUC metrics to optimize detection accuracy and minimize false positives.

TECHNICAL SKILLS

- **Languages:** Python, Java, C
 - **Core CS:** Data Structures, Algorithms, OOP, OS
 - **Libraries:** NumPy, Pandas, Scikitlearn, Matplotlib
 - **Domains:** Software Engineering, Machine Learning
-

CERTIFICATIONS

- Gen AI Study Jam 2024 – Google Developer Groups (GDG)
 - Exploratory Data Analysis, SSC NASSCOM
 - Acquiring Data, SSC NASSCOM
 - Data Processing and Visualization, SSC NASSCOM
 - Certification in Power-BI Tools
-

SOFT SKILLS

- Problem-Solving
- Collaboration
- Adaptability
- Time Management
- Creative thinking
- Active listening
